

Cloud CCTV Storage

Big data, Best choice

Home & SME Cloud Surveillance

Web-based cloud storage and video services, a new profit recourse for SIP

Safe City Cloud Surveillance

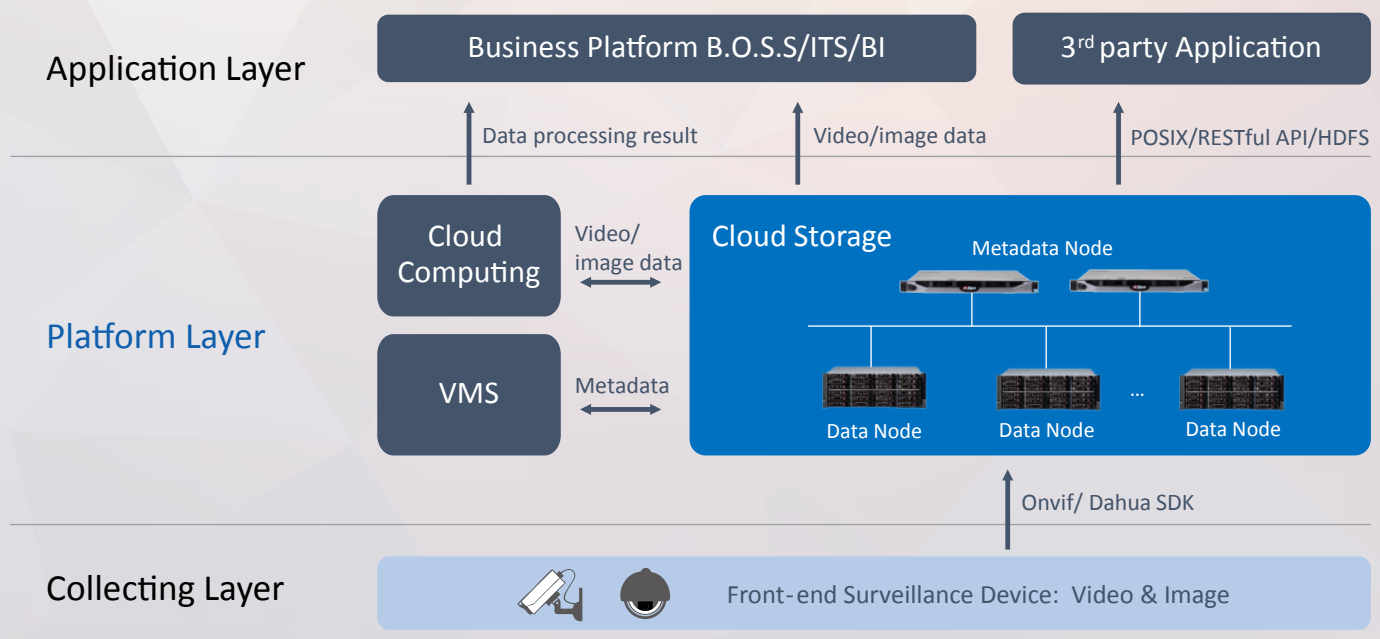

Massive storage capacity with high availability and efficiency

Intelligent Traffic Surveillance

Combined with cloud structured analysis, enabling fast vehicle and individual targeting

System Framework >>

Key Features >>

Dahua Extremstor cloud storage featuring an object storage architecture that delivers unparalleled performance and linear scalability, is able to meet the requirement of massive data storage and provide a fundamental platform for data mining.

Easy for Surveillance

Store video stream directly, saving the cost for 3rd media server.
All videos are stored offsite in our cloud servers.
User can login to access the surveillance via either PC client or mobile client.

High Performance

With one interface and a single login, you can manage your entire sites in one base versus logging into hundreds of separate systems.

Easy Setup

Unlike traditional CCTV system, cloud cctv can be setup with minimal front end hardware. No server to buy and maintain.

Easy to Expand

Online capacity expansion by simply adding storage node without interrupting business running.

The screenshot displays the DSS Express web interface with a navigation bar at the top containing 'Home', 'Live', 'Playback', 'User', 'DeviceManage', 'ACS', and 'EventCenter'. The main content area is a grid of ten functional modules, each with an icon and a brief description:

- Live View:** Multiple-window preview, supports to control PTZ, snapshot, instant playback, tour and etc.
- PlayBack:** Multiple-window playback, supports fast play, slow play, record mark, playback and etc.
- E -Map:** Visual display of device installation area, supports map preview, playback, alarm and etc.
- Event Center:** Display all events be level, process live alarm, and view record history
- Video Wall:** Control output preview and playback onto video wall, supports tour
- Download Center:** Multiple methods to export record file from central server and front-end storage device
- Personnel Management:** Add user and details, supports to issue card, private password and other authorization
- Access Control:** Remote control of A&C device, supports door group authorization and unlock rule setup
- Video Intercom:** Call management of VDP devices, supports to send message to VTH
- Alarm Controller:** Zone arm/disarm, subsystem arm/disarm, Zone and subsystem status monitor

Below the interface screenshot, three computer monitors are shown displaying different views of the DSS Express system. At the bottom, three logos are displayed: the Windows logo, a software box icon labeled 'Software', and the DSS Express logo labeled 'C/S'.
